

ACTIONQUOTE stats

Statistical Analysis Software for Domestic Insurance

- Actionquote stats is designed exclusively for insurance companies to analyse segments of the domestic market for product design and pricing purposes.
- Analyses quoting profiles against a selected list of insurers, the marked average or single insurer for selected geographical locations.
- Generates reports for easy comparison for multiple risks from multiple insurers on the one report.
- Results data is automatically generated in Microsoft Excel, giving the user the opportunity to use of the full analysis and presentation of the product
- Reporting Modules are based on the standard Actionquote *desktop* quotation programs used by Australian Intermediaries.
- Assist insurers to distinguish where they currently stand in the Market place.
- Save labour intensive task of researching the Domestic Insurance market.

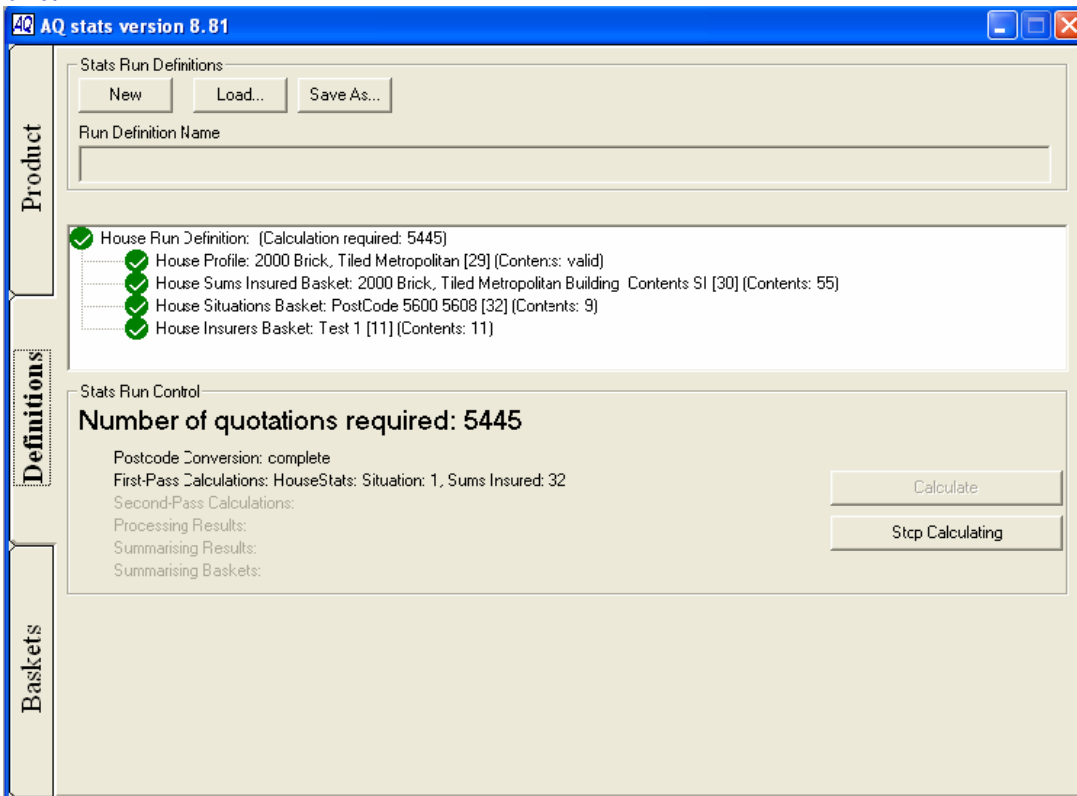

Actionquote stats Statistical Analysis products are designed exclusively for use by insurance companies to analyse segments of the market for product design and pricing purposes.

Actionquote stats House and Motor facilitates quoting profiles to be entered and analysed against a selected list of insurers, the marked average or single insurer.

Actionquote stats reporting module is based on the standard AQ desktop quotation programs used by intermediaries. It is the only comparative software product available to insurers in Australia

Actionquote stats House and Motor facilitates allows you to analyse against a Single insurer or multiple of insurers.

Actionquote stats is an ideal product for the insurer to distinguish where they currently stand in the market, it allows the insurer to compare their rating structure to all the major Australian underwriters and adjust accordingly. It saves the labour intensive task of researching the market.

Actionquote stats calculating data for over 5445 quotations within the parameters required just less than 10 minutes.
